System Security Engineering (SSE) integrates research and technology protection into the Systems Engineering Process. It prevents or delays exploitation of Critical Program Information (CPI) in U.S. defense systems and may include Anti-Tamper (AT) activities. It supports the development of programs and design-to-specifications providing life-cycle protection for critical defense resources.

System Security Engineering - AcqNotes

A site's security can be significantly enhanced by combining two or more entry authorization identifiers such as a biometric characteristic with a smart card or a proximity card with a PIN code. However, combining identifiers results in increased verification time and will decrease throughput rate.
