A diesel locomotive is a type of railway locomotive in which the prime mover is a diesel engine. Several types of diesel locomotive have been developed, differing mainly in the means by which mechanical power is conveyed to the driving wheels. Early internal combusition locomotives and railcars used kerosene and gasoline as their fuel. Dr. Rudolf Diesel patented his first compression ignition ...

The InterCity 125 (also referred to as the High Speed Train) is a diesel-powered passenger train built by British Rail Engineering Limited between 1975 and 1982. Each is made up of two Class 43 power cars, one at each end of six to nine Mark 3 carriages. The name is derived from its top operational speed of 125 mph (201 km/h). Initially the sets were classified as Classes 253 and 254.
