In Windows 7 (also the case in Windows 8/10) by default the Windows Firewall is set to block ping requests. To be able to ping your host from one of your virtual machines--or anywhere else on your LAN, for that matter--you will need to either disable the firewall or enable the firewall rule that allows ping requests.

Unable to ping from VM's to host machine - Super User

That is not the way JS or angular work. Update. Since what you are trying to do is to be able to create new instances, you should probably create this in a service, and then in the controller you can inject your service.

javascript - Creating a class in Angular - Stack Overflow

Prof Ashok Jhunjhunwala has made enormous contribution in academic area. His research areas are optical communication, computer network, wireless communication, decentralized solar and Electric Vehicles, where he has significantly contributed in various dimensions.

x. Shri. C. VR. Rajendran was appointed as the Managing Director & CEO of the Bank with effect from December 9, 2016. Shri. Rajendran is a seasoned banker with solid grassroots level Indian banking experience spanning more than three and a half decades.

About Us | Catholic Syrian Bank

An object database is a database management system in which information is represented in the form of objects as used in object-oriented programming.Object databases are different from relational databases which are table-oriented. Object-relational databases are a hybrid of both approaches.. Object databases have been considered since the early 1980s.
