Cryptography lives at an intersection of math, programming, and computer science. This subreddit is intended for links and discussions surrounding the theory and practice of modern and strong cryptography. Please note that this is a technical subreddit, not a political one! The focus is on the algorithms and the security of the implementations.

Cryptography is the process used to design the systems used to this. Cryptanalysis is responsible for breaking such systems. It is hard to do either cryptanalysis or cryptography if you lack a good understanding of the methods used. The term coding theory is commonly used to describe cryptography; however, it leads to confusion at times.
